## Septic Tank Pumpers

- When choosing a septic tank pumper, the price quoted should include completely pumping both sides of the tank. If your septic tank has an effluent pump, it will need to be removed prior to pumping to enable your pumper to thoroughly clean both compartments of your tank.
- If your pumper recommends additional repairs, please check with the District as to the necessity of these repairs prior to authorizing the work.
- There is no need to purchase additives for your septic tank; what naturally goes into your septic tank is the best additive.  
\* Please forward a copy of your receipt to our office so that we may update your file.
- Select septic tank pumpers also complete septic system repairs.
